### Mojave Air, Space Port move towards space goals

By Cathy Hansen  
Special to Aerotech News

Mojave Air & Space Port aerospace companies are working towards the future of new developments in cutting edge technologies and focusing their goals space. In addition, some are competing in with the spirit of innovation and a shared mission to develop the solutions needed to protect healthcare workers and save lives during the COVID-19 global pandemic.

"We couldn't be more proud of our business' accomplishments," said Kanna Dees, CEO and General Manager of Mojave Air & Space Port.

Virgin Galactic/The Spaceship Company

Virgin Galactic Holdings, Inc. and its wholly owned subsidiary, The Spaceship Company, announced on May 5 the signing of a Space Act Agreement with NASA to facilitate the development of high speed technologies.

The Space Act Agreement is set to enable and foster collaboration between NASA, Virgin Galactic and The Spaceship Company in order to advance the United States' efforts to produce technically feasible, high Mach vehicles for potential civil point to point applications.

Virgin Galactic believes that it is able to leverage its robust platform of advanced technologies, vertically integrated design, engineering and manufacturing capabilities, and thousands of hours of flight testing to develop additional aerospace applications. Together with its industry partners, Virgin Galactic is seeking to develop a vehicle for the next generation of safe and efficient high speed air travel, with a focus on customer experience and environmental responsibility.

George Whitesides, CEO of Virgin Galactic and The Spaceship Company, recently wrote an article and he gave his permission to share some of it with Aerotech News.

"During the current global crisis, we believe that the space industry has a responsibility to share expertise, knowledge, resources, and agency to aid in the fight against COVID-19," wrote Whitesides. "That's why today, we're proud to share that Virgin Galactic is meeting this responsibility head-on through a Space Act Agreement with NASA."

Employees at Virgin Galactic and The Spaceship Company developed and tested the PPH Hood – a device designed to support patients admitted to hospitals with COVID-19 with portable oxygen-rich pressure chambers, making the subsequent need for ventilators less urgent, and subsequent potential deaths.

**Fighting COVID-19**  
George Whitesides, CEO of Virgin Galactic and The Spaceship Company, recently wrote an article and he gave his permission to share some of it with Aerotech News.

# Overview

Digital Advertising is an important part of your marketing plan

Aerotech News and Review's digital platforms are robust and maintain a high level of reader engagement.

This screenshot displays a digital publication page with several advertisements. At the top, there are ads for 'ALWAYS FREE ACCESS!' with a US flag, 'Ken Neill Kennels' with a dog, and 'Lentor Company' with a house. Below these is a large ad for 'PERFORMANCE MORTGAGE' featuring 'Nidy Scott', a Senior Loan Consultant, with contact information and a photo. The date 'May 29, 2020' is visible at the bottom.

Digital Publication

This screenshot shows a Facebook advertisement for Aerotech News and Review. It features a US flag and lists three key benefits: 'VA Zero Down Loan Program', 'No Cap On Max Amount You Borrow', and 'No Private Mortgage Insurance'. A 'LEARN MORE' button is present. The ad includes engagement icons for Like, Comment, and Share, and a timestamp of 0:00 / 2:08.

Facebook Ads

This screenshot shows the Aerotech News website. A red box highlights an advertisement for 'FOR YOUR SERVICE' with the text 'Show your MILITARY ID for an extra \$10 BONUS'. A red arrow points from this ad to the 'AFRL centrifuge part of NASA's history-making launch' article. The website header includes 'AEROTECHNEWS' and 'Modern Infrared short course June 22-26, 2020 UCSB'.

Website Advertising

This screenshot shows an inline advertisement for 'DAVINC AIRCRAFT, INC.' placed within a news article. The ad features the company logo, contact information, and a photo of an aircraft. A red arrow points from the ad to the article text. The article title is 'AFRL centrifuge part of NASA's history-making launch'.

Inline Story Advertising

This screenshot shows a sponsored advertisement for 'SLEEP ADVISOR'. The ad includes the text 'SLEEP & THE MILITARY: The need to sleep is important for everyone but maybe even more so for those that protect their country...For more click here'. It also features a 'DIGITAL EDITION' section with a computer monitor image and a 'demo' button. A red arrow points from the ad to the 'DIGITAL EDITION' section.

Sponsored Advertising

This screenshot shows an email newsletter advertisement for 'The Right Team Makes All the Difference'. It features photos of two women, Nidy Scott and Amy Heath, and their contact information. A red arrow points from the ad to the 'FOR THE SERVICE AND EXPERIENCE YOU DESERVE' text. The newsletter header includes 'AEROTECHNEWS.COM' and 'Aerospace, Military and Veteran News of the Southwest U.S.'.

### F-35 arrives at MCAS Miramar

June 2, 2020 33

A U.S. Marine Corps F-35C Lightning II with Marine Wing Fighter-Attack Squadron (VMFA) 314, 3rd Marine Aircraft Wing lands at Marine Air Station Miramar, Calif., May 11, 2020. The F-35C will give 3rd MAW a technological advantage by bringing the next wave of 5th generation fighter jets to the Marine Corps. (Marine Corps photograph by Sgt. Dominic Ramers)

Marine Fighter Attack Squadron 314 welcomed its most recent delivery of the F-35C Lightning II at Marine Corps Air Station Miramar May 18, 2020.

Earlier this year, the VMFA-314 Black Knights made history when they became the first F-35C squadron in the Marine Corps.

"We are extremely excited to be receiving our seventh aircraft today," said Lt. Col. Cedar Hinton, commanding officer of VMFA-314. "Each of these amazing machines represents a significant leap in capability for our squadron and brings us one step closer to becoming fully combat capable."

Since their inception in 1943, the "Black Knights" have prided themselves on leading the transition to modern aviation platforms in support of evolving Marine Corps missions. In 1952, they were the first squadron in 3rd Marine Aircraft Wing to fly the F-9F Panther. The Black Knights became the first Marine Corps squadron to adopt the F-4B Phantom in 1961, and the first in the Department of the Navy to fly the F/A-18 Hornet in 1982.

With mission sets that range from intercepting and destroying enemy aircraft to providing network enabled reconnaissance support in combat operations, the capabilities of the F-35 bring more lethality and flexibility to combat commanders than any other fighter platform. The F-35 represents the future of Marine Corps tactical aviation, and will deliver strategic agility, operational flexibility, and tactical supremacy to the Marine Air Ground Task Force.

The 3rd MAW continues to "Fix, Fly and Fight" as the Marine Corps' largest aircraft wing, and remains combat-ready, deployable on short notice, and lethal when called into action.
